Prepared by SoftCare IT Solutions

06 September 2026

Reference: SCI/TSOC/AGR/2026-0906

CONFIDENTIAL - FOR CLIENT REVIEW

This Software Implementation and Service Agreement (the “Agreement”) is entered into on ____ / ____ / 2026 (the “Effective Date”) by and between:

Service Provider	SoftCare IT Solutions (“SoftCare”), represented by _____, Title _____.
Client	Tarin Shefa OPD Clinic (the “Clinic”), represented by _____, Title _____.
Client address	ارزان قیمت د داود خان او ماموریت څلورلارو ترمنځ میر علم ترین پلازا - کابل افغانستان

SoftCare and the Clinic are individually a “Party” and together the “Parties”.

1. Purpose

The Clinic appoints SoftCare to configure, implement, host, train users on and maintain ShifaaScript according to this Agreement and its schedules. SoftCare accepts subject to timely cooperation, payment and access.

2. Agreement Documents and Priority

This Agreement includes Schedule A (Scope), Schedule B (Users, Training and Delivery) and Schedule C (Fees and Maintenance). In conflict, the signed Agreement takes priority, then its schedules, then the proposal. A later signed addendum overrides a conflicting earlier term.

3. Included System Scope

SoftCare provides the modules in Schedule A. HR and Expenses receive reasonable configuration and modification against jointly documented requirements. Work outside scope uses Clause 9 change control.

4. User Accounts and Role-Based Access

Initial deployment includes 16 active named accounts including one administrator. Access follows approved roles. Ultrasound may be assigned to an included doctor; Room Booking and Surgery to authorized reception users. Credentials must not be shared.

IMPORTANT: Supplied staffing figures describe 17 operational positions before Admin. The Clinic must finalize multi-role assignments or revise the roster so initial deployment remains within 16 active named accounts including Admin. Any increase requires written approval.

5. Implementation and Cooperation

SoftCare conducts discovery, configuration, agreed initial data setup, training, UAT support and deployment. Timeline is agreed at kickoff. The Clinic provides accurate data, forms, authorized contacts, decisions, test users, feedback and approvals. Clinic-caused dependency delays extend affected dates.

6. User Acceptance and Go-Live

SoftCare notifies readiness for UAT. The Clinic tests agreed workflows and reports reproducible material issues in writing. SoftCare corrects confirmed material non-conformities within a reasonable period. Go-live, productive

use or written confirmation constitutes acceptance. Minor issues do not prevent acceptance.

7. Training

Initial role-group training is included for Reception/Finance, Pharmacy, Laboratory, Doctors/Ultrasound and Administration. The Clinic ensures attendance, devices, internet/power and coordination. Additional training due to turnover, missed sessions or new scope may be charged after approval.

8. Implementation Fee and Payment

The one-time fee is USD 1,800: USD 900 (50%) on signing/kickoff; USD 540 (30%) when ready for UAT; and USD 360 (20%) on go-live or acceptance, unless changed in writing. SoftCare may pause work/access for overdue undisputed amounts after notice.

9. Change Control

Maintenance includes minor configuration, wording, field, layout or report refinements that do not create a new module or major redesign. X-Ray, Dental and other new modules are excluded. Major changes require written requirements, separate quotation, approval and schedule.

10. Monthly Maintenance, Domain and Hosting

From go-live, the Clinic pays USD 100 monthly in advance for routine maintenance, domain, hosting and routine support while active users are 24 or fewer. Above 24, a revised quotation applies only after written agreement. Overdue undisputed invoices may result in suspension after notice.

11. Support and Maintenance Standard

SoftCare uses commercially reasonable efforts to maintain the application, apply updates, administer routine backups and address reproducible issues. Maintenance excludes Clinic devices/networks/power/internet, unsupported third parties, misuse, shared credentials, unauthorized changes and events outside SoftCare control.

12. Clinic Responsibilities

The Clinic provides lawful/accurate data, decision-makers, suitable equipment/connectivity, user administration, credential protection, entry verification and compliance with applicable patient confidentiality, medical record and employment obligations.

13. Data Ownership, Access and Export

The Clinic owns its patient, clinical, financial, staffing and operational data. SoftCare accesses it only to implement, host, support, secure or troubleshoot, or as authorized. After termination and settlement of undisputed dues, SoftCare provides a reasonable standard-format export; custom migration may be quoted.

14. Software and Intellectual Property

SoftCare retains ShifaaScript, source code, architecture, reusable components, documentation, methods and general improvements. The Clinic receives a non-exclusive, non-transferable right to use the hosted system for its own operations during the Agreement. Copying, resale, reverse engineering, sublicensing or third-party provision requires written permission.

15. Confidentiality and Security

Each Party reasonably protects the other's non-public business, technical, financial and patient information and limits disclosure to personnel who need it. The Clinic controls authorized users and lawful patient-data use. Relevant suspected incidents must be reported promptly.

16. Warranties and Limitations

SoftCare warrants reasonable professional care and substantial conformity with scope. Service remains subject to hosting, connectivity and third parties. Neither Party is liable for indirect, incidental or consequential loss. SoftCare aggregate liability is capped at fees paid in the prior six months, except where prohibited by law.

17. Term, Suspension and Termination

The Agreement begins on the Effective Date. Monthly service continues until terminated. Either Party may terminate with 30 days written notice after settling undisputed obligations. A curable material breach receives 15 days to cure. Termination includes an agreed data-export period.

18. Force Majeure

Neither Party is liable for delay/failure beyond reasonable control, including disaster, widespread outage, government restriction, conflict, civil disturbance or major third-party failure. The affected Party notifies and resumes when possible.

19. Notices and Dispute Resolution

Operational notices use designated written channels. Parties first seek good-faith resolution. Unresolved disputes are subject to laws applicable in Afghanistan and competent courts of Kabul unless another written arrangement is signed.

20. General Terms

Assignment requires consent except lawful succession assuming obligations. Unenforceability of one provision does not affect the rest. Waivers and amendments must be written. This Agreement and signed addenda form the entire agreement. Electronic/scanned counterparts may document agreement subject to applicable requirements.

Schedule A - Included and Excluded Scope

Module	Included capabilities	Planned access / notes
Reception	Patient registration, front-desk workflow and reception finance/payment collection.	4 day-shift + 2 night-shift staff requested.
Pharmacy	Medicine records, purchases, sales, stock control and pharmacy reports.	2 day-shift + 2 night-shift staff requested.
Laboratory	Test ordering, sample workflow, results entry and laboratory reports.	2 day-shift + 2 night-shift staff requested.
Doctor Prescription	Electronic prescriptions and relevant patient clinical history.	3 doctors across day/night operations.
Ultrasound	Ultrasound workflow and reporting access.	One included doctor user; no separate account.
Room Booking	Room availability and booking workflow.	Operated by authorized reception users.
Surgery	Surgery scheduling/recording within the existing agreed module.	Operated by authorized reception users.
HR	Configuration and reasonable modifications against confirmed requirements.	Requirements documented during discovery.
Expenses	Expense recording/reporting and reasonable modifications.	Requirements documented during discovery.

Excluded scope

Excluded item	Commercial treatment
X-Ray module	Not included in the USD 1,800 implementation price.
Dental module	Not included in the USD 1,800 implementation price.
Any other new module	Separate analysis, quotation, approval and implementation schedule required.

Schedule B - Users, Training and Delivery

Initial active accounts	16 total, including one Admin account
Maintenance threshold	USD 100/month while active users are 24 or fewer
Reception request	4 day + 2 night staff; final roster subject to 16-user cap
Pharmacy request	2 day + 2 night staff
Laboratory request	2 day + 2 night staff
Doctor request	3 doctors; one may also hold Ultrasound permission

Role training	Included for each initial role group
Delivery dates	Confirmed after requirements, data and roster readiness

Schedule C - Fees and Maintenance

Commercial item	Price	Billing / condition
System implementation	USD 1,800	One-time price for included scope and 16 initially configured named accounts.
Maintenance + domain + hosting	USD 100/month	While active users remain at or below 24; begins at production go-live.
More than 24 active users	Revised quotation	Price changes only through a written quotation/addendum.
Minor changes	Included	Small refinements that do not create a new module or major redesign.
New modules / major changes	Additional price	Written requirements, quotation and approval required.

Signing / kickoff	USD 900
Ready for UAT	USD 540
Go-live / acceptance	USD 360
Monthly service from go-live	USD 100, payable monthly in advance
